NAB's petition 04-160 does nothing for the public benefit and/or welfare. Restricting XM (or anyone else) from distributing information ONLY eliminates fair and open competition to provide the best services via EACH vendors chosen medium. The public gets punished while a select few corporations benefit. Many of the same corporations seeking this protection from competition are the same irresponsible bunch who brought us the Super Bowl half time show.

REJECT HIS PETITION...DO NOT REWARD THE FEW AT THE EXPENSE OF THE PUBLICS RIGHT TO CHOSE THE METHOD BY WHICH THEY GET THEIR TRAFFIC/WEATHER information.

I willingly pay for this service out of pocket, why? It is better quality than is available on the "free" airways.....If the "free" airwaves want to get me to listen to their services....let them do it by offering a BETTER service...not by eliminating my choice....
